Food Contact Compliance

This product is compositionally compliant with 21 CFR 177.2600 – substances employed in the preparation of rubber articles intended for repeated use. Accordingly, FDA regulations for rubber articles intended for repeated use allow the use of this product in manufacturing rubber articles that are intended for repeated use in producing, manufacturing, packing, processing, preparing, treating, packaging, transporting or holding food provided such articles are manufactured in accordance with other applicable FDA requirements. These requirements include the following provisions:

- Articles are manufactured in accordance with Good Manufacturing Practice as defined by U.S. FDA regulations and guidance. Such practices may include post-baking the rubber article, depending upon the article and application. Momentive recommends appropriate post-baking of the rubber articles.
- Substances employed in the preparation of rubber articles conform to applicable regulations promulgated by the FDA and/or other agencies or Trade Organizations having jurisdiction. Momentive Performance Materials will support applications to various agencies or Trade Organizations, when requested and where appropriate.
- The quantity of any substance employed in the production of rubber articles intended for repeated use shall not exceed the amount reasonably required to accomplish the intended effect in the rubber article and shall not be intended to accomplish any effect in food.
- Finished rubber articles intended for repeated use in contact with food shall be thoroughly cleansed prior to their first use in contact with food.

PRODUCT NAME	LSR 2650
---------------------	-----------------

5. Rubber articles intended for use with dry food are so formulated and cured under conditions of good manufacturing practice as to be suitable for repeated use.

6. Rubber articles intended for repeated use in contact with aqueous food and fatty foods meet the extractive limitations as specified in 21 CFR 177.2600(c).

Disclaimer: The CFR sections for all components of a product should be consulted in complete context before any conclusion is made as to the allowed regulated use. Please note that substances listed in 21 CFR may carry limitations and/or use restrictions. Consideration for sections of 21 CFR not listed above would require further evaluation. Please consult the FDA regulations for other specifications and limitations, which may apply. The customer has the sole responsibility for determining that their product complies with all applicable FDA specifications and limitations and is fit for food contact use.
